Aluminium as a Material

Aluminium is an excellent metal, created from raw materials that are extremely safe and toxin-free.

It is **heat-friendly** and does not produce any harmful products during the heating pro- cess. Being **highly malleable**, it is the ideal choice for food packaging and it helps pre- serve flavour and enhances the shelf life of food products.
With its good decoration features, impeccable cost-performance advantage and the wide range of uses and benefits it offers, aluminium is an extremely versatile and sturdy metal that is now being demanded on a larger scale.

Non Toxic

Heat Friendly

Highly Malleable

Why Aluminium?

Besides its superior quality and utilitarian benefits, aluminium is a material that recycles forever and also an environmentally sound choice.

It is a material that can be easily **recycled** and thereby helps reduce emissions and greenhouse gases. There is no significant loss of its benefits during the recycling process, so it is a durable choice. Aluminium is a long-lasting metal that is built for the future.

Be sustainable & use aluminium.

Aluminium is a mono material.

Aluminium is the only packaging material that is recycled 100%.

100% recyclable without loss of property.

75% of aluminium products is still in use.

By recycling aluminium, you save 95% carbon dioxide.

At Paczen, we envision a sustainable & efficient future

Features of Our Products

High Barrier, Anti-Oxidation
Extends the shelf life of food.

Temperature Spectrum
Can withstand temperatures from -40O° C to 350° C.

High Mechanical Strength
Strong impact resistance & piercing ability.

Strong Adaptability
Can adapt to various environments.

Easy to Process
Can meet most packaging needs.

Lightweight
Reduces transportation costs & product packaging volume.

Protects Environment
Saves energy without polluting the environment.

Microwavable & Oven Friendly
Extends the shelf life of food.

How To Use Aluminium Containers In Microwave Ovens

The lid or sealing film* must be removed from the container before use.
*If not otherwise stated on packaging.

The meal should cover most of the base of the container.

Place the aluminium container in the middle of the turntable in the microwave oven.

The aluminium container must not come in contact with the walls of the microwave oven.

Only one aluminium container may be used in the microwave oven at a time.
